

Great Divide Trail

1:80,000 Map set

Includes larger scale overview maps of the entire GDT route and each of the sections. There is also a town map of Waterton Lakes.

Note:

These 1:80,000 scale topographic maps are provided by Dustin Lynx based on the official GDTA route as of Spring 2022. Owing to the large scale of these maps, they are intended as a print backup to an electronic means of navigation, such as an app or GPS device. The waypoints, segments, and sections are aligned with the guidebook, Hiking Canada's Great Divide Trail, 4th Edition, by Dustin Lynx. The coordinates for these waypoints are listed in the guidebook starting on page 395. You can also download a full list of coordinates and waypoints as a KML file from the Google map available at <https://greatdividetrail.com/trip-planning-re-sources/maps/>

Please use these maps according to your own discretion and at your own risk.
